

C# Tip

IMPROVE READABILITY

WITH

LOGICAL PATTERN OPERATORS

C# Tip

GOOD

```
bool IsLetter(char ch) {  
    if(ch >= 'a' && ch <= 'z') || (ch >= 'A' && ch <= 'Z')  
    {  
        return true;  
    }  
}
```

BETTER

```
bool IsLetter(char ch) {  
    if(ch is (>= 'a' and <= 'z') or (>= 'A' and <= 'Z'))  
    {  
        return true;  
    }  
}
```
